1 Tables

For a single section event, the tables are organised into a section (A or Red or whatever....) and numbered from Table 1 upwards. For two or more section events, new sections (B or Green etc) are used in the same way. Each section can have up to 30 Tables.

1.1 Program Constraints

The current program limits are: -

- Tables 30 in each section; event total = max 1000 pairs
- Sections 72
- Rounds 30
- Sessions 48
- Boards per Round 24
- Boards per Session 60

1.2 Sessions

At the start of each session, boards are numbered from 1 by default. This can be changed when setting the movement. Scores are carried forward from one session to the next.

1.3 Score Input

The program supports several different scoring methods: -

Pairs	2 Matchpoints for a win, 1 Matchpoint for a draw (Neuberg or Simple)
US Pairs	1 Matchpoint for a win, ¹ / ₂ Matchpoint for a draw (Neuberg or Simple)
Aggregate	All scores are added together (Mitchells only)
Butler	Each score is IMP'd with the 'Datum' score or a Fixed Datum. Total Imps may be
	factored for pairs playing different numbers of boards. You may put a cap on a match.
Cross Imps	Each score is IMP'd with comparable scores. Total Imps may be factored for pairs
	playing different numbers of boards. You may put a cap on a match.
Cross Imps To VPs	As Cross Imps but uses the Probst method to equate to a "TEAMS" VP Scale

Score entry can be manual or via Bridgemates. At any time, it is possible to change the score entry method. If a problem were to develop with the Bridgemates, then you can switch to manual input of scores - reassuring!

1.4 Movement

Mitchell (Skip or Share & Relay for odd number of tables), Hesitation, Howell, Switched Mitchell or another movement from the system supplied list. The user may set his own movements in a User Movement File.

1.5 Names

For regular Club use, populate the Player database before using the program. Set the National Bridge Organisation accordingly (assumed to be EBU in this document), then click **Download EBU Database** button to download the current EBU database and make it available for Bridgemate name display. Entered Player numbers are normally checked as Player Id or an EBU number, but the Player ID check may be disabled. New Player numbers (EBU No + Player Name) will be added to the Player Database if necessary. Also, you can import in a preset list of players onto the Names screen.

1.6 Handicaps

A player handicap may be set in the Player Database. A pair's handicap is either the sum or optionally the average of the two player handicaps. The Scorer supports the Jourdain Method where the Pair Handicap is added to the Gross Percent Score. Thus if your Handicap is +4, partner +6 and you score 52%, your Net Score is 57% (Using Average, Pair Handicap = 5). You may set a list of Handicaps in a file at a particular time to be used in new events.

1.7 Ladder

You can make a Ladder reflecting player results over a set of Events.

1.8 Bridgemates

Secttion 1 Bridgemates are usually set as A1,A2 upwards, Section 2 as B1,B2 etc. If set up as one section spread over two or more playing areas via a LAN, it is advisable for each area to work with a different channel.

Revised 5-March-2018

2 Player Database

Select Player Management Tab

Double-click the PairsScorer desktop icon or select it from the Start menu. The main menu will be displayed. Click *Player Database* in the Main Menu

The **Event History** screen records up to 400 events. Each Event will correspond to a Bridge Section. It is empty at the start but will be populated as new Events are created. It is advisable to clear out old event files from time to time. This is done by highlighting the event and Click **Delete Event**. To delete all the files in a multi event for an event you must first delete the Multi Control Event – select this event and then click **Delete Event**. Then click on the first of the component event files, hold down the Shift key and click on the last of the component event files - they should all be highlighted. Click **Delete Event**. The program will ask you for confirmation – hold down the <Return> key and all the component files will be deleted one after the other.

Revised 5-March-2018

 Return Print Ranks lear Score

Click Enter Scores on the Event Menu to open the Travellers

Using the drop-down boxes at the top of the screen, navigate to the appropriate Session, Section. Using the listbox, select the appropriate board. You can use the 'N' or '*' key to quickly move to the Next Board or 'P' or '/' key to move to the Previous board. Command keys (e.g. N, P etc may be entered in Upper or Lower case)

8.1 Entering or Replacing a score

Enter the score as 420, -90 or 420+, 90- etc in the yellow Score box in the Score column followed by Return and the score will be updated. There is an option to omit the final zero e.g.42+ or 9- etc. Alternatively, enter the contract details in the score column. Click *Score Entry Guide* button to see the different ways of score entry.

8.2 Repeating a score

Press the 'R' or ',' key in the appropriate yellow Score box

8.3 Deleting a score

To delete a score – click in the appropriate yellow Score box in the Score column on the row corresponding to the NS & EW Pair numbers and press the 'D' key (case does not matter) – the score is deleted.

8.4 Replacing a score with an Arbitral score

Click in the appropriate box and enter the score as 50/50, 40/60, 60/00 etc. followed by <Enter>

8.5 Split Score

Using the Weighted Scores box enter the details of both scores. In the example (NS get 100% of NS+420, EW get 100% of NS+50) Then click box in the score column and press the 'W' key. Split scores may be shown by pressing the 'S' key.

8.6 Fouled Boards

Use the F command to matchpoint any score in a separate subfield after the board was fouled.

8.7 Pairs sit in Wrong Direction

The A command may be used on the board to Arrow switch the particular pair's score(s). Alternatively you may change the pair's number by clicking on the pair number and following the instructions.

8.8 Other Adjustments

Return to the Event Menu and click the Properties button

Click on the Column labelled Adj corresponding to the pair, type in the value of the adjustment, and click **OK to** exit to **Event** screen.

You may also set a Category (up to 4 characters) on this screen which will appear on the final Rankings and may be used as a filter on the final Rankings list.

9 Bridgemate Scoring

Set out the Bridgemate scoring device and table number as required. When they are turned on, they will ask for confirmation of the section (A) and the table number. Please ask North's to check the table number. Check that the BM server is on (USB / battery power light and battery status light on the controller should be illuminated).

Click Bridgemate Scoring to open the main Bridgemate control screen.

The Expected(Exp) and Received(Rx) number of results is monitored for each Table, with the Missing Board results also listed. The parameters for receiving Member Numbers is also shown (Player IDs unless inhibited in Player Database>Management screen, or NBO Numbers or either).

Click Set BCS Options to set the required Options for Pairs Scoring

	Shutdown Automatically close BCS at end of session (Not allowed in Swiss Events)

You can click **Restore EBU Pairs Defaults** to set the usual BCS options. To allow EBU number entry by the players, (or 0 if unknown) on the Bridgemates, ensure the **Member Numbers** (NBO Numbers) box is ticked. PairsScorer will decode both PIDs and EBU numbers from the Player & EBU Database. On the Bridgemate II tab, the Name Source determines from where the BCS will search for numbers usually Player & EBU Database also.

Ensure you set Session = 1 to do the Scoring for Session 1 only.

Click *Create Database* (bottom left) to create the Bridgemate Control Database (.bws file) Ensure the "**Reset Server**" box is ticked, click *Launch BCS* and confirm if asked to do so.

The Bridgemate Control Software Program (BCS) will be started and you should see the 14 Tables being added as clients to its Server. Minimise the BCS Display.

9.1 Reading Names

Players can enter their NBO number at the start. Any player without an NBO number can enter zero or blank. After the first round is well underway, check if all players have entered their number by clicking on the "Print Numbers" button. If any names are missing, make a note of their table and position and get their name.

Return to the Names screen to correct Names and then reenter Bridgemate screen. (You can also write Names/Numbers using the BCS Names Tab in the BCS program). You can send the corrected values back to BCS by clicking *Write Names* button so they will appear correctly on the Bridgemate screens.

9.2 Running the Session

Progress can be monitored on the Results Screen, so for Round 1, the display indicates that it is expecting 28 scores. *Exp* is the total scores expected in a particular round, *Rx* is the total scores received to date. Missing results are also shown along with any anomalous results. The number of scores received for individual tables is shown under the appropriate table column. Any score amendments or adjustments are best corrected on the BCS screen or on the BMs. Alternatively, they may be corrected on the Enter Scores screen at a later stage.

9.3 Scrolling Results

To display scrolling results, tick in the Cycle frame **Ranks** and **Scroll**. The results should appear on the bridge room screen. You can click **Travellers button** to quickly check any results.

10 Reports

<i>Print Menu</i> ⁰ Ranks	Ranks Note				Category	Session	
 Travellers Scorecards Matchpoints Frequencies Movement Start Lineup Ticket History Club Print 	Ranks Handicaps Masterpoint Prizes/Qual Section First Names Pair Order Exclude Ad	ers lifiers s only				Section All Print To © Notepa © CSV F © Excel() © Web Ti © Web Ti	le (LS) File able
Find Player	Display On Screen	Printer Preview	Send To Printer	Scroll Report	Internet Functions	Printer Settings	Retu

When all the results are in, click Return to get to the Event Menu and click Reports.

If Bridgemates are in use, close BCS via *File > Close > File > Exit*

From *Reports* menu, you can publish a wide range of reports in a variety of formats. For example, to print Ranks with Masterpoints, Select *Ranks* in the Print Menu and *Rank + Masterpoints* in the Print Options. Now click *Display on Screen* to show ranks in a Notepad File or *Send to Printer* to print on paper. You can display in various formats *CSV, XLS* or *Web Table/Text*. A copy of the report is saved in the Reports folder in the PairsScorer installation folder. Text will be output to Notepad Text Editor. You can use Club Print to show the Ranks, Scorecards and Travellers in one report.

Click **Printer Settings** button to open the Printer Settings screen where you can change the printer and adjust the HTM colors. To leave the **Printer Settings** screen click **Return**. Once set you should not have to change the Printer Settings.

To leave the Display Reports screen,

Click *Return* to Event Menu Click *Return* to Event History

11 Internet Functions

Select the Internet Functions tab at the top of the Display Reports screen. Click *Upload Bridgewebs CSV File* button to upload the results to Bridgewebs. Click *Create EBU UMS File* button to create an EBU UMS file. Click *Go to EBU Website* button to upload the UMS file.

12 Exit Event

Click Return to Events Menu and on the Events Menu, click Exit Event. This will take you back to the Events History screen.

Click Return to Main Menu to get back to the main menu and then Exit to close Pairs Scorer.

Shut down the PC, turn the printer off and turn the Bridgemate server off by pressing the "Battery OFF" button for two or three seconds.

13 Multi Events

To run MultiSection and Multisession events, you need to combine single events together.

To illustrate, we will combine the earlier 14 Table Mitchell movement with two 7-table 26 board Full Howells (Green/Blue sections) for a two session event suitable for use in a 2-session County Pairs all-day event.
Session 1: 14-Table, 13 x 2 board Round Skip Mitchell, with last two rounds Arrow Switched (Red Section).
Session 2: Two 7-Table 26 board Full Howells (Green/Blue Sections).

13.1 Create Session 2 Single Events

The procedure is exactly as for Session 1 but with the Session 2 information. Click *Create New Event* button in Event History screen

Two 7 Table Howell events are needed – one for Green Section, one for Blue Section.

13.3 Multisession Control Event

lic	k Col Hdr to sort	Pre	ss F9	for Help							Γ	Default Date On	rder
No	Event Name	Date	Sess	Sect	Tb	Rd	Brds	Mv	Sc	Upl	Components		
1	County Pairs	17/10/13	1	Bluey	14	13	1-28	S	Pr	-			
2	County Pairs	17/10/13	2	Green	7	13	1-26	H	Pr				
3	County Pairs	17/10/13	2	Red	7	13	1 - 26	H	Pr				
4	County Pairs	17/10/13	М	Multi	14		54		Pr		123		
								_					
•	elect consecutive even												3
		ts click firs	- s		_	-		1.6	-				
	eate New Retrieve Even	nt Delete E	/ent	Import Eca Event	ats		lerge ctions			ombine ession			

To make a combined Scorer Control event, return to the Event History screen and click the three events. Now Combine Sessions. Confirm and a message 'Combined to Event 4' appear. That Event may be used to control the whole event (or you can combine Events 2 and 3 and control Session 2 separately).

13.4 Link Movements

In a Multisession Event, you must set up how the pairs move in between Sessions. This is done via the *Event Menu* > *MultiSession Links* menu.

Session 1 Red Section Pairs 1 – 14 move to Session 2 Green Section Pairs 1 to 14 Session 1 Red Section Pairs 15 - 28 move to Session 2 Blue Section Pairs 1 to 14

In this case, you can use the **Retain Position for all Sessions** since the Pairs actually retain their pair number in this movement. You need to click **Save Displayed Line Movement** to set the Line Movements for each Session movement. The Names will automatically be copied from Session 1 to Session 2 into the appropriate positions.

14 Running Session 2

This is very similar to Session 1.

When you need to start a new session in a Multisession, navigate to the **Bridgemate Scoring** screen and <u>set the</u> <u>new session number displayed (near top of screen).</u>

The procedure for retrieving scores is identical to the Session 1 process:

Click Create Database; ensure Restart server is ticked then click Launch BCS > Yes.

15 Administration Screen

There are some useful housekeeping facilities available on the Administration screen.

3. Administration	– 🗆 X
User Movements File	C:\EBUScore\Pairs\PSMovements.bt
